## **Rototech Hu Series Forced Cooling Fan**

Rototech have added to their range of Hu Series Forced Cooling Fans. Units are now available to suit motor sizes 80-480 frame.

The Rototech Forced Cooling Fans are specifically designed to maintain good air flow over 3 phase electric motors that are operating at low speed, and are particularly suitable for motors controlled by variable speed drives.

An auxiliary terminal box is mounted on the fan cover while the fan leads are terminated in the terminal box.

Other key features of the Cooling Fans include:

- 1) All metal cowl construction,
- 2) 415V 3 Phase 50Hz,
- 3) IP55
- 4) High airflow and low operating noise (60-80db).
